

POST IN A CONSPICUOUS PLACE

CAUTION!

**No Gasoline Shall Be
Sold, Delivered or Stored
Except in a**

RED CONTAINER

With the name of the product clearly marked or labeled
thereon or in other legally designated containers.

**KEROSENE, DIESEL FUEL OR BURNER OILS SHALL NOT BE
DELIVERED, PLACED, RECEIVED OR STORED IN ANY
CONTAINER WHICH IS IN ANY MANNER COLORED RED.**

**(For complete information refer to Section 168.11
of the Wisconsin Statutes on the Back of this card.)**

**STATE OF WISCONSIN
Department of Commerce
Environmental and Regulatory Services Division
Bureau of Retail Petroleum Services**

CONTAINER IDENTIFICATION FOR PETROLEUM PRODUCTS

Section 168.11 of the Wisconsin Statutes provides that:

- (1) All devices used for drawing products of petroleum from storage containers at filling stations, garages or other places where such products are sold or offered for sale shall be marked or labeled in a conspicuous place and in a conspicuous manner with the name and the grades of the product of petroleum being dispensed.
- (2) No person may deliver, place, receive or store in any visible container any gasoline; any product of petroleum, regardless of name, meeting the gasoline specifications prescribed by the department under s.168.04; or any product of petroleum commonly or commercially used as a fuel in a spark-ignition internal combustion engine or as a fuel for any appliance or device if such product of petroleum has a flash point of less than 100° F. when tested in the Tagliabue closed cup tester unless the container is constructed of sound metal or of equally sound nonflammable material meeting the requirements of the department's flammable and combustible liquids code; is substantially a bright red color; and has the common name of the product clearly labeled or painted on it. These requirements do not apply to:
 - (a) The fuel supply tank permanently connected to an internal combustion engine;
 - (b) The fuel supply tank which is structurally a part of any appliance or device consuming the fuel;
 - (c) The first use of any container of one gallon or less originally filled by a manufacturer or packager when the container complies with the packaging and labeling requirements of the federal government and its agencies; or
 - (d) Containers of 275 gallons capacity or more. This provision does not exempt such containers from the identification requirements under Wis. adm. code.
- (3) Except for containers referred to in sub. (2) (a), (b) and (c) no person may deliver, place, receive or store any kerosene, diesel fuel or burner oil, or a like product of petroleum which has a flash point of 100° F. or more when tested in the Tagliabue closed cup tester, in any visible container which is in any manner colored red.
- (4) No person may use interchangeable any pipeline, hose, pump or metering device to dispense gasoline (or a like product of petroleum which has a flash point of less than 100° F. when tested in the Tagliabue closed cup tester) and to dispense kerosene, diesel fuel or burner fuel oils (or a like product of petroleum which has a flash point of 100° F. or more when tested in the Tagliabue closed cup tester) unless such a pipeline, hose, pump or metering device has been sufficiently flushed and cleaned before such interchanged use to eliminate any contamination, of products due to such interchanged use.

Section 168.15 of the Wisconsin Statutes provides that:

Every person who violates any provision of this chapter shall forfeit not less than \$10 nor more than \$100 for each violation. Each day a person fails to comply with any provision of this Chapter is a separate violation.
